

COURROIES DE DISTRIBUTION RPM :

# **RACING PERFORMANCE MUSCLE**

**LES COURROIES ULTIMES EN MATIERE  
DE RESISTANCE ET DE PERFORMANCE**

## **CONCEPTION DE PRECISION POUR MOTEURS SURALIMENTES**

Fabriqué à partir d'une corde en fibre de verre cinq fois plus résistante que l'acier, aucune autre courroie ne peut résister à la rude épreuve que font subir l'induction forcée et les moteurs à débit élevé.

Régime moteur élevé. Accélération rapide. Obtenez une puissance optimale avec les courroies de distribution Gates RPM

# PERFORMANCES DE COURSE EXTREMES

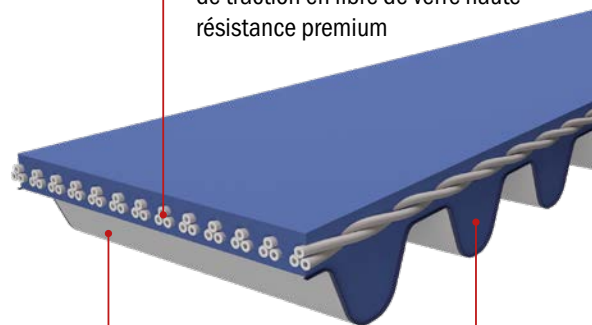

## LES TECHNOLOGIES DE COURROIE DE DISTRIBUTION GATES SONT EN AVANCE SUR LEUR TEMPS

Nous savons que les passionnés de course automobile et de voitures de sport ont besoin de courroies de distribution qui protègent le moteur de leur voiture de sport tout en profitant d'une puissance extrême pour des applications à haute vitesse. Nous avons donc réuni une équipe d'experts automobiles et d'ingénieurs produits, et avons passé plusieurs années à travailler avec quelques-uns des plus grands constructeurs et pilotes automobiles du monde pour créer nos courroies de distribution innovantes RPM. Les courroies de distribution Gates sont composées d'un matériau composite élastomère HNBR, d'une corde de traction et d'un revêtement denté spécialement conçus pour résister à des chaleurs extrêmes et aux rigueurs d'une puissance élevée sur route comme sur piste.

- Sa construction supérieure offre jusqu'à trois fois plus de résistance à la chaleur et à l'usure, et de performance.
- Le revêtement portant les dents de la courroie est renforcé par du nylon haute performance conçu pour minimiser l'usure.
- Les cordes de traction haute résistance doivent supporter des puissances plus élevées pour des courroies de distribution pouvant résister aux moteurs à interférence.
- Mélange de caoutchouc HSN spécialement conçu pour améliorer la solidité et résister à l'usure provoquée par les contacts avec les fluides du moteur.

**CORDE DE TRACTION :** Le surplus de résistance provient des cordes de traction en fibre de verre haute résistance premium

**REVETEMENT CRANTE :** Résistance supplémentaire à l'usure grâce à un revêtement en nylon renforcé robuste à double denture

**DENTURE :** Les composés en élastomère HNBR à saturation élevée contribuent à la durabilité et à la résistance à la chaleur exceptionnelles grâce au renforcement en aramide
