

RPM-DISTRIBUTIERIEMEN:

VERSTERKT VOOR RACEPRESTATIES

MAXIMALE KRACHT EN PRESTATIES

NAUWKEURIG ONTWERPEN VOOR MOTOREN MET DRUKVULLING

Vervaardigd met stevig glasvezel koorden dat vijf keer sterker is dan staal. Er is geen enkele andere riem die de kracht van turbomotoren met een hoog vermogen beter weerstaat.

Hoog toerental. Snelle acceleratie. Zorg voor een optimale druk met Gates RPM-distributieriemen.

EXTREME RACEPRESTATIES

GATES-DISTRIBUTIERIEMTECHNOLOGIEËN ZIJN HUN TIJD VER VOORUIT

We wisten dat autosportliefhebbers en prestatievoertuigen distributieriemen nodig hebben die de motor van uw prestatievoertuig beschermen en tegelijkertijd een extreem vermogen leveren bij toepassingen met hoge snelheden. Daarom hebben we een team van auto-experts en productingenieurs samengesteld en jarenlang samengewerkt met enkele van de beste autofabrikanten en racers ter wereld om onze innovatieve RPM-distributieriemen te creëren. De distributieriemen van Gates zijn vervaardigd met HNBR-elastomeercomposieten en een speciaal ontworpen trekkoord en tandmantel voor extra stevigheid en hittebestendigheid, ontworpen om hoge pk's te weerstaan, zowel op de weg als op het circuit.

- De superieure constructie biedt tot drie keer meer hittebestendigheid, slijtvastheid en prestaties.
- De tandmantel van de riem is versterkt met hoogwaardig nylonmateriaal om slijtage tot een minimum te beperken.
- De zeer sterke trekkoorden zijn bestand tegen hogere pk's, voor distributieriemen die goed standhouden tegen interferentiemotoren.
- Speciaal geformuleerde HSN-rubbersamenstelling om de stevigheid te verbeteren en aantasting door contact met motorvloeistoffen te weerstaan.

TREKKOORD: extra sterkte dankzij hoogwaardige, zeer sterke glasvezel koorden

TANDMANTEL: extra slijtvastheid dankzij extra versterkt nylonmateriaal, dubbele tandsterkte

TAND: HNBR-elastomeercomposieten met hoge dichtheid dragen bij tot de uitzonderlijke duurzaamheid en hittebestendigheid met aramideversterking
