

# CORREIAS DE DISTRIBUIÇÃO RPM: **MÚSCULO DE ALTO RENDIMENTO NAS CORRIDAS**

## O MÁXIMO EM FORÇA E DESEMPENHO

### ENGENHARIA DE PRECISÃO PARA MOTORES TURBOALIMENTADOS

Criada com fio de vidro resistente, que é cinco vezes mais forte que o aço, não há outra correia que suporte a implacabilidade que é forçada pela indução e elevada potência que os motores de alto rendimento aplicam.

RPM elevadas. Aceleração rápida. Garanta o máximo impulso com as correias de distribuição Gates RPM.

# DESEMPENHO DE CORRIDAS EXTREMO

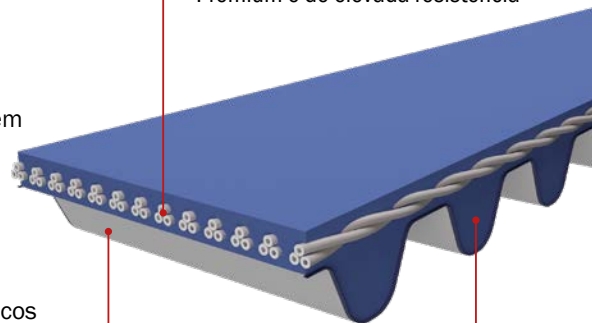

## AS TECNOLOGIAS DAS CORREIAS DE DISTRIBUIÇÃO DA GATES ESTÃO À FRENTE DO SEU TEMPO

Sabíamos que os entusiastas das corridas de automóveis e dos veículos de alto desempenho precisavam de correias de distribuição que protegessem o motor dos seus veículo, fornecendo em simultâneo uma potência extrema em aplicações de alta velocidade. Por isso, reunimos uma equipa de especialistas e engenheiros de produtos automóveis e passámos anos a trabalhar com alguns dos principais fabricantes de automóveis e pilotos no mundo para criar as nossas inovadoras correias de distribuição RPM. As correias de distribuição Gates são construídas com compósitos elastoméricos HNBR e um cabo tensor e revestimento dentado especialmente concebidos para uma elevada força e resistência ao calor, concebidas para suportarem os rigores de elevada potência da estrada até ao circuito.

- A construção superior oferece até três vezes a resistência ao calor, a resistência ao desgaste e o desempenho.
- A cobertura dos dentes da correia é reforçada com material de nylon de elevado desempenho para minimizar o desgaste.
- Os cabos flexíveis de alta resistência resistem a uma potência mais elevada, para correias de distribuição capazes de suportar motores com interferência.
- O composto de borracha HSN foi especialmente formulado para aumentar a resistência e resistir à degradação devido ao contacto com fluidos do motor.

**CABOS FLEXÍVEIS:** A resistência adicional advém de fios de vidro Premium e de elevada resistência

### REVESTIMENTO DOS DENTES:

Resistência adicional ao desgaste proporcionada por tecido de nylon de reforço robusto e a força dos dentes duplos

**DENTE:** Os compósitos elastoméricos HNBR de elevada saturação contribuem para uma durabilidade excepcional e resistência ao calor com reforço de aramida
