

RPM-KAMREMMAR:

RACINGPRESTANDA

ULTIMAT STYRKA OCH TOPPRESTANDA

TILLVERKADE MED HÖG PRECISION FÖR KOMPRESSORMATADE MOTORER

Tillverkade av höghållfasta glaskordar som är fem gånger starkare än stål. Det finns ingen annan rem som klarar den tuffa miljön hos motorer med forcerad induktion och hög utgångseffekt.

Högt varvtal. Snabb acceleration. Säkerställ optimal boost med Gates RPM-kamremmar.

EXTREM RACINGPRESTANDA

GATES KAMREMSTEKNIK ÄR FÖRE SIN TID

Vi vet att bilracingentusiaster och tävlingsbilar behöver kamremmar som skyddar fordonets motor, samtidigt som de levererar extrem kraft i höghastighetstillämpningar. Därför har vi sammanställt ett team av bilexpert och produktioningenjörer och samarbetat med några av världens främsta biltillverkare och racerförare för att skapa våra innovativa RPM-kamremmar. Gates kamremmar är konstruerade med HNBR-elastomerkompositer och en specialkonstruerad dragkord och kuggmantel för hög hållfasthet och värmebeständighet, utformade för att klara av de höga påfrestningarna från vägen till racerbanan.

- Överlägsen konstruktion ger upp till tre gånger högre värmebeständighet, slitstyrka och prestanda.
- Remmens kuggmantel är förstärkt med högpresterande nylonmaterial för att slitaget ska minimeras.
- Höghållfasta dragkordar tål högre effekt, för kamremmar som klarar miljon i interferensmotorer.
- Speciellt framtagen HSN-gummiblandning för att hållfastheten ska förbättras och nedbrytning på grund av kontakt med motorvätskor ska förebyggas.

DRAGKORD: Extra styrka tack vare högkvalitativa, höghållfasta glasfiberkordar

KUGGMANTEL: Extra slitstyrka tack vare kraftigt nylonmaterial ger dubbelt så starka kuggar

KUGGE: HNBR-elastomerkompositer med hög mättnad bidrar till exceptionell hållbarhet och värmebeständighet tack vare aramidförstärkning
