

COOLING SYSTEM

## POWER CLEAN™ FLUSH TOOL

### THE SMARTEST TOOL TO AVOID COMEBACKS

Proper flushing is one of the most critical elements of cooling system maintenance, yet it is often the most neglected service item in the workshop today. Inadequate flushing can lead to premature failure of newly installed parts, resulting in warranty problems and frustrated customers. Gates now arms professional technicians with the specialist tool for in-depth cleaning of the cooling system – quickly, safely and with proven results. Because doing the job properly avoids costly comebacks and keeps customer satisfaction levels high!

## POWER CLEAN™ FLUSH TOOL

**A SUPER CLEAN  
COOLING SYSTEM WITH  
GATES POWER CLEAN™  
FLUSH TOOL**

Just like engine oil and transmission fluid, engine coolant deteriorates over time. It can also get contaminated with abrasive particles and foreign materials forming damaging deposits. As a result, it is very important to periodically flush the complete cooling system including the radiator, engine block and heater core. A complete flush is also critical before changing cooling system service parts.

With a conventional drain, flush and refill much of the contaminated coolant and harmful debris is left behind. It also does little to address the problem of severe accumulated debris. The use of Gates Power Clean™ Flush Tool with patented pulsating technology is the solution to overcoming these problems.

Using clean water and compressed air, this specialist tool safely removes accumulated debris and contaminants without the use of harsh chemicals or solvents. A complete set of tips and connectors allows the tool to be used on radiator necks, engine blocks and heater core tubes. The tool's process allows air to pressurise the water to scrub deep into corners and crevices, removing trapped debris, and it automatically regulates the pressure to a safe level if a hard blockage exists, eliminating the possibility of damage to the system.

***Just think of how many comebacks can be avoided by using the Gates Power Clean™ Flush Tool!***
